

Accessing Service

Family members, as well as care and treatment professionals, can access service directly through a Service Director/Coordinator listed on our website or by calling 1 866 226-2565.

After receiving information on a request, a Service Director/Coordinator contacts the family to discuss options.

Fees apply upon commitment to service. The family always has final decision-making authority in terms of the amount of service required and with full knowledge of fees.
